

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Appln. No. 09/653,408

Page 3, please delete the second full paragraph, and replace it with the following

new paragraph:

BS
A system 10 for steering the pod 1 is shown as being integrated in the top of the mast 2, but can be located inside the pod 1 which would contribute to simplifying installation of the wind-power generator.

Page 3, please delete the third full paragraph, and replace it with the following new

paragraph:

AS
The fairing 7 is advantageously an interference fit on or intimately contacts the stator 3, and lateral openings 11 pass through the stator 3 so as to direct the hot air created by rotation of the rotor 4 against the fairing 7 so that the hot air is cooled by flowing along the fairing 7 which acts as a heat exchanger with the air on the outside of the pod 1.

IN THE CLAIMS:

Please enter the following amended claims:

*Sub B1
B7*

1. (Amended) A wind-power generator pod comprising a rigid fairing in which at least one electricity generator is disposed for coupling to at least one wind-driven propeller, wherein the rigid fairing of the pod is formed by the body of the generator in which a stator and a rotor are mounted.
2. (Amended) The pod according to claim 1, in which the rigid fairing of the pod is surrounded by a tubular sleeve forming a substantially annular air passage along the pod.
3. (Amended) The pod according to claim 1, in which the fairing of the is an interference fit on the stator of the generator.

AMENDMENT UNDER 37 C.F.R. § 1.111

U.S. Appln. No. 09/653,408

Am

4. (Amended) The pod according to claim 1, in which lateral openings extend through the stator.

5. (Amended) The pod according to claim 1, in which the generator is coupled to the wind-driven propeller via an epicyclic gearbox.

Subj D

6. (Amended) The pod according to claim 5, in which said gearbox is mounted inside said rigid fairing.

7. (Amended) A wind-powered generator comprising a pod according to claim 1 and mounted to swivel at the end of a mast.
